IMPROVEMENTS OF IMPREGNATED DIAMOND CORE BITS

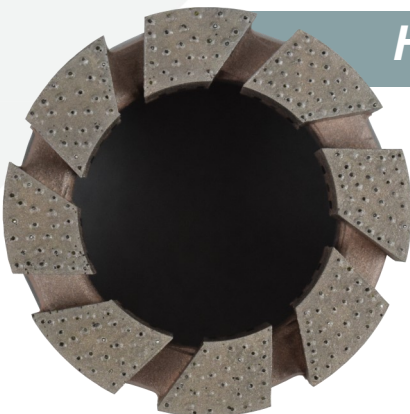

QUICK START FOR IMMEDIATE PERFORMANCE

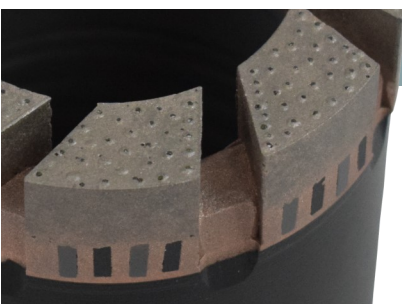

- Regular distribution of diamonds in the active cutting layer of a Core Bit
- Assures immediate drilling performance of Core Bits.
- Minimizes bedding-in time of a Bit.

HURRICANE FOR EASY MATERIAL REMOVAL

- Oblique-angled waterways
- Better ejection of drilling fluids and thus removal of residual material
- Suitable for all types of rock
- Recommended especially for application in broken rocks

CALIBRATION FOR LONGER LIFETIME

- Calibration elements on outer and inner rim of a Core Bit
- Available for all kinds of Impregnated Core Bits
- Outer / inner diameter of a Bit remains constant much longer
